EDUCATION

University of Lagos

Bachelor of Medicine, Bachelor of Surgery

Lagos, NG

Aug. 2018 – May 2024

EXPERIENCE

Abodes Lagos

October 2025 - February 2026

- Developed and maintained a responsive real estate platform using Next.js, React, and Tailwind CSS.
- Integrated property listing APIs and implemented dynamic search and filtering functionality.
- Built reusable UI components to accelerate feature development and maintain design consistency.
- Collaborated directly with stakeholders to translate business requirements into production-ready features.
- Performed testing, debugging, and optimization to improve application reliability and user experience.

Axel Cyber LLC

February 2025 - September 2025

- Developed responsive landing pages and web applications for clients across Africa, Canada, and the United States.
- Collaborated with cross-functional teams to deliver features within project deadlines.
- Integrated REST APIs and managed frontend state for data-driven applications.
- Conducted testing and debugging to ensure cross-browser compatibility and application stability.

Yield Vest

August 2024 - November 2024

- Leveraged Nuxt 3 to develop and maintain frontend features for a fintech platform.
- Debugged and resolved application issues to improve performance and reliability.
- Collaborated with team members to deliver production-ready features.

PROJECTS

EngageX AI | *React, Next.js, TypeScript, Tailwind, Firebase*

February 2025 - June 2025

- Developed and maintained key frontend features for an AI-powered communication coaching platform using Next.js and TypeScript.
- Built and optimized the marketing homepage and authentication flows, ensuring responsive and accessible user experiences across devices.
- Integrated REST APIs for user authentication, session management, and platform data retrieval.
- Implemented interactive data tables with sorting, filtering, pagination, and state management for administrative and reporting workflows.
- Collaborated with backend developers and designers to translate product requirements into scalable frontend solutions.
- Conducted extensive manual testing, bug identification, and feature validation to ensure reliability and production readiness.

Kanban Board | *CSS, React.js, SQLite React Drag and Drop*

August 2024 - September 2024

- Developed a task management kanban board
- Built it with React drag and drop feature to help users drag and drop tasks between todo, ongoing, and completed.
- Made use of the CURD API to connect to the backend built with node/express.js
- Provided a local database with SQLite to save tasks and their statuses.
